

Our story — by the numbers

Other data center builders might claim they are the #1 choice for all your needs. At Compass, we have the numbers to back that up:

Faster to ready.
Longer lasting.
Fully fungible.

85% percentage of our data centers built off-site – meaning faster to ready... by a lot!

30-50% reduction in time-to-ready using preconfigured, factory-tested power centers

40% reduction in on-site interventions and 20% reduction in service costs with built-in AI-driven predictive maintenance solutions

36,500 number of days you can expect your Compass data center to be operational (based on our 100-year-campus model)

The making of a hyperscale campus

19.5
days to get to pad ready

37
days from pad to shell - our current record

96
days to install 4500 square yards of sustainable cement and 10,000 linear yards of telecom duct bank

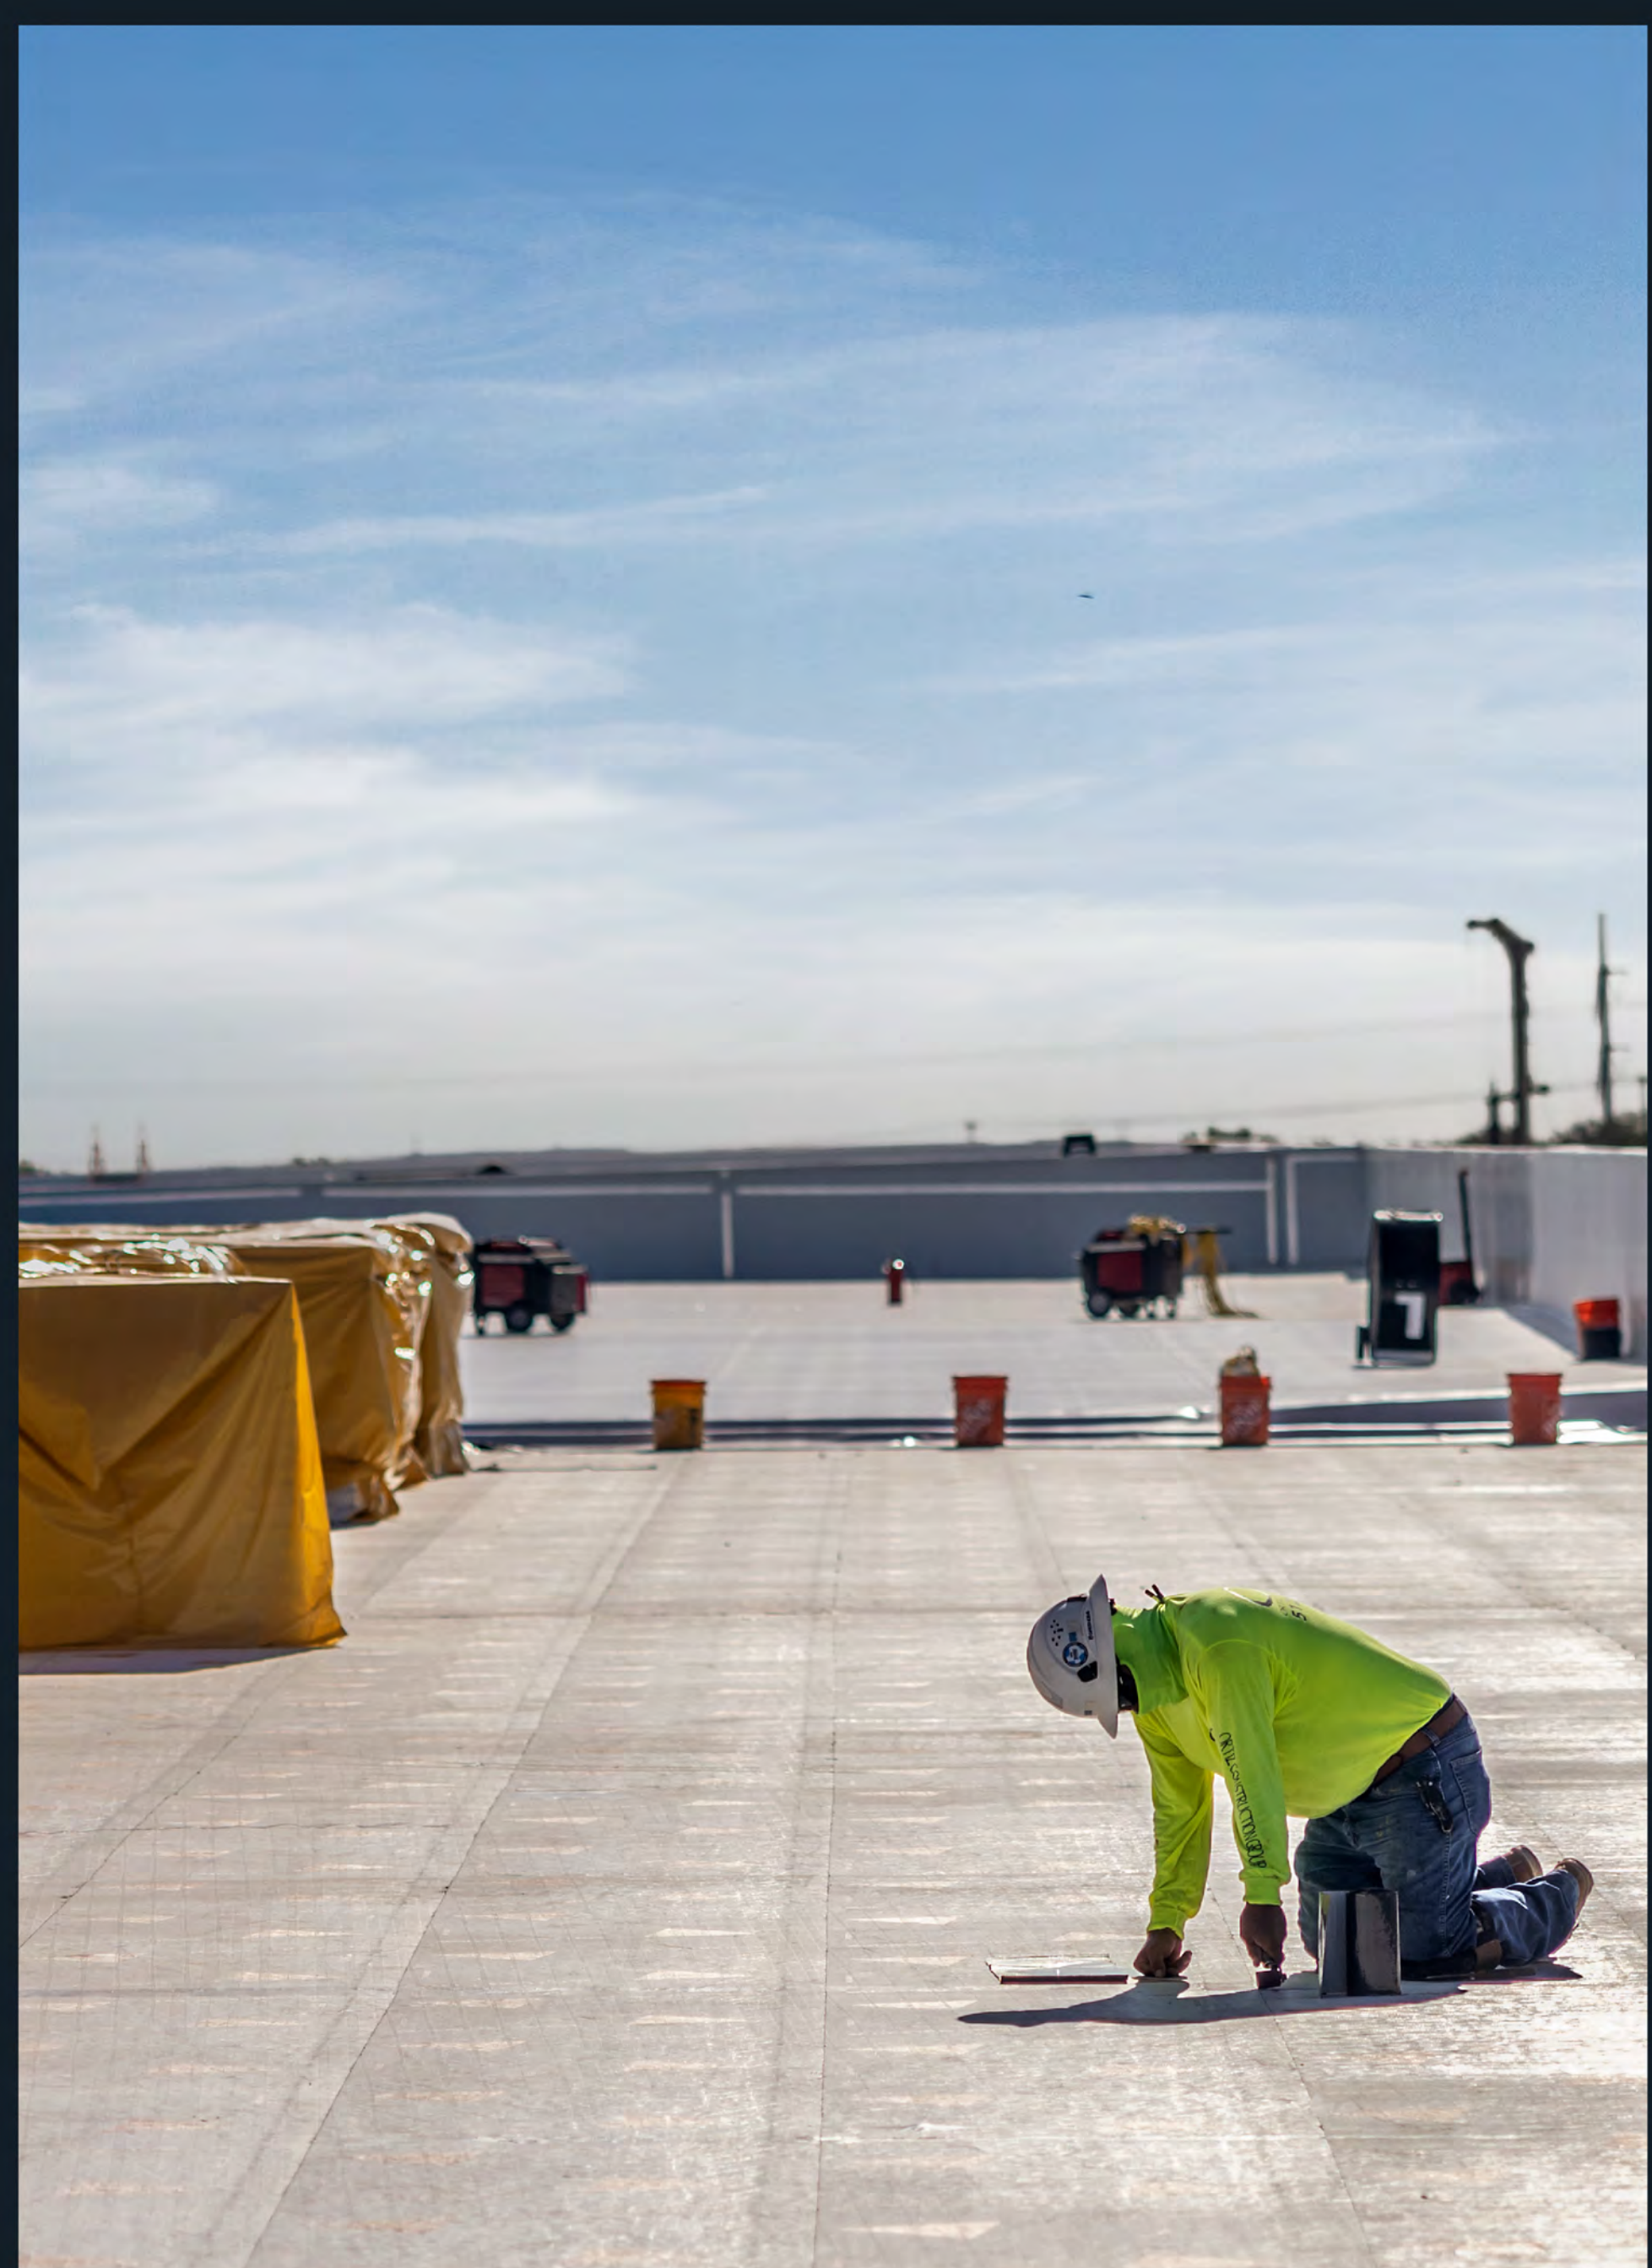

50.8
average days ahead of delivery schedule in North America in 2025

A responsible approach

-4,813
tons reduction in GHG emissions with reflective roofing

37
pounds of CO2 saved per cubic meter of concrete with CarbonCure

85%
reduction in GHG emissions with biodiesel in our generators vs. conventional

Compass Datacenters — #982

of the 5,000 fastest growing companies in America – 2025, Inc. Magazine
